EDURNE RUBIO (Spain, 1974) is a visual artist graduated from the Faculty of Fine Arts of the University of the Basque Country, Bilbao (1998) and based in Brussels, Belgium, since 1999.

Her practice shifts among different contexts and formats: performances, films and sound projects. Edurne Rubio creates situations where tension is built up between what we see and what we hear, between present, memory and imagination. With an anthropological approach, she uses interviews as her primary method of work, collecting individual stories to build a collective narrative and, in so doing, she questions any linear reading of History, offering a subjective reading in continuous transformation and dependent on affections
